About Me

5 years of experience in software engineering, with nearly 4 years in the Fullstack Developer role (Frontend Heavy).

Currently working on an outsourcing startup, so I have the chance to work on all aspects of production-grade products.

I am also a member of [Grokking_VN](#), which is an organization passionate developers can share fundamental knowledge with each other.

My pros are research and self-learning skills since new things always pique my curiosity.

My target is to become a Solution Architect in the near future.

Education

- Bachelor in University of Science, VNUHCM**
09/2015 - 09/2018
Information Technology

Work Experience

- SaigonTek 12/2019 - Present**
Fullstack Developer / Solution Architect
 - Developed 4+ products for VN & JP customers, mostly for the JP market.
 - Worked on all aspects of the development processes: Requirement analytics, Consultant, Architect design, Planning, Wireframe review, Task Management, Development, and Monitoring.
 - Product fields:** F&B management system, Headless CMS, E-commerce, Social networking.
 - Contributed to some OSS projects on Github: [shopify/draggable](#), [conwnet/github1s](#), and so on.
 - Tech Stack:** VueJS (Nuxt), Tailwindcss, NodeJS, PHP, MySQL, Linux cloud servers, AWS (EC2, ALB, S3, VPC, Route53, SES, and so on), GoCD, Flutter.
- Gogojungle VN 12/2017 - 12/2019**
Junior Fullstack Developer
 - Developed & maintained an e-commerce system for the Japanese market.
 - Worked on all three Frontend, Backend & DevOps teams.
 - Tech Stack:** VueJS, PHP (Laravel), NodeJS, MySQL, Linux cloud servers.

Certificates

- UX Design Fundamental - Nordic**
06/2021 - 08/2021
 - Learned the standard UX design process. It helps me empathize with designers and stakeholders. Thereby creating a better product for the end-users.
